CONSUMER TIPS > >

1. Recommended strength: 2 percent solution.
2. If this strength not available, ask druggist to dilute stronger solutions with grain alcohol to make 2 percent solution.
3. Bottles should have glass or rubber stoppers, not cork.
4. Keep bottle tightly closed.
5. Iodine gets stronger when alcohol evaporates, and should be thrown away after it's a year old.

(over)

DON'TS

1. Don't use iodine near eyes, mouth, or other body cavities.
2. Don't use iodine on large skinned surface or large open wound. These should be treated by a doctor.
3. Don't use iodine twice on same wound except on advice of doctor.

HOW TO USE

1. Wash hands well.
2. Wash wound with soap and water.
3. Apply iodine to wound and skin around wound.
4. Don't cover with bandage unless necessary to keep clean, and then only after iodine is dry.
5. Never cover wound directly with adhesive tape.
